

Our Vision and Philosophy

Our company originated over twenty years ago, based on the premise that all people - at one time or another, need help with food – good, wholesome, healthy food that – by the way - also tastes great!

Sometimes it's event or party foods that are needed, or sometimes it's a simple meal – just to get nutritious food into your busy daily life.

Our food program for schools began in 1996, based on a similar idea – that busy moms and dads don't always have the time or all that's necessary to put a well-balanced lunch together – every day for their children. That's where we come in We are here everyday for you and your children with hot, healthy menu choices and a robust a la carte menu that's enjoyable and available everyday to your student, or on an "as needed basis".

What's in it for YOU?

- A Happy child for one thing!
- Assurance that your child can go to school each day and look forward to, and enjoy a healthy wholesome lunch or a favorite a la carte choice. All this, without the worry of any pre-planning the night before or the hectic morning rush of deciding what will be packed for lunch.
- Trust in knowing that we are cooking the kind of food that you would - given the necessary time to plan, and not least of all – the energy to prepare it!

What's in it for US?

We enjoy the pleasure and opportunity to serve your children, creating happy diners and educating a generation about the importance of healthy eating habits. While we're at it, we'd like to expose them to new food experiences so that they learn to appreciate good food - and food that's good for them. Giving children tools and knowledge to build a strong foundation about food choices empowers them to live healthier lives and makes them stronger, building long lasting bridges.

Where We've Come in the Journey

Food ... Water ... Shelter ... the basics. We began by providing the basics and then added a little comfort. And realized that children need to learn about making better choices earlier vs. later - the reality hit that pizza is not it's own food group! From where we were, we've made some changes! We also realized that small changes along the way make a big difference and improvement. We removed as many processed foods as possible – all the while, trying to keep children interested and enjoying lunch. A fine line we walk! Our menu is much more sophisticated, to keep up with demand and the desire to offer adventurous and healthful choices. Below, you will find some additional information regarding our service. We wish you the best school year yet!

Some Things to know about our Service:

Standard Operating Procedures

- Nothing fried – Everything is baked with as many foods directly made from scratch as possible.
- No canned vegetables – all are fresh. We use only two frozen vegetables – corn and peas.
- We consciously avoid and seek to source products that are HFCS, GMO and MSG free. We make our own Ranch dressing mix in house – with no preservatives!
- All ingredients for each meal on the General Menu are available and are on our website. Friday ingredient information is available upon request.
